

```

import java.util.Scanner;
public class s0 {
    public static void main (String[] args) {
        Scanner aa = new Scanner (System.in);
        int a = aa.nextInt();
        if (a % 2 == 0) {
            System.out.println("偶数");
        }
        else {
            System.out.println("奇数");
        }
    }
}

```

```

import java.util.Scanner;
public static void main (String[] args) {
    Scanner a = new Scanner (System.in);
    System.out.println("输入");
    int e = a.nextInt();
    switch (e) {
        case 3:
        case 4:
        case 5:
            System.out.println("春季");
            break;
        case 6:
        case 7:
        case 8:
            System.out.println("夏季");
        case 9:
    }
}

```
